Usman Ali

FULL-STACK WEB DEVELOPER

Islamabad, Pakistan | usmnse@gmail.com | +92 303 4230454 | linkedin.com/in/usman54 | github.com/Usman-54 | usman-54.github.io/portfolio

PROFESSIONAL SUMMARY

Software engineer focused on building complete web applications, from responsive, user-friendly interfaces in HTML, CSS, Bootstrap and JavaScript to robust back ends in Python with Django and PHP with Laravel. Developed multi-role, database-driven platforms — including a donation management system and a vaccination record system — as real working software, not coursework alone. Seeking a software development role where clean, maintainable code and end-to-end ownership add immediate value.

TECHNICAL SKILLS

Frontend Development	HTML5, CSS3, JavaScript, Bootstrap 5, responsive design
Backend Development	Python, Django, PHP, Laravel, Node.js
Databases	MySQL, SQLite, relational schema design
Developer Tools	Git, GitHub, GitHub Pages
Languages	English (professional working proficiency), Urdu (native)

PROJECTS

Khairunas Foundation — Multi-Role Donation Platform · github.com/Usman-54/FYP-project

Final Year Project · Django, SQLite · Source

- Built a web platform in which admins, donors, volunteers and general users manage and track charitable activities within one system.
- Implemented role-based access and record keeping across donation workflows using Django's MVT architecture, forms, admin site and migrations.
- Designed the relational data model and shipped the application with a working SQLite database and template-driven front end.

Children Vaccination System

Django, Python, MySQL · demo available on portfolio

- Developed a web-based platform for recording and tracking children's vaccinations, with separate admin and user panels.
- Structured the app to help health workers keep records current and ensure timely immunisation follow-up.

SIS Safety Courses — Course Management System

Web application

- Built a web-based system that lets institutes publish safety training programmes and students register, enrol and access course materials online.

EDUCATION

BS Software Engineering — University of Malakand

Chakdara, Lower Dir, KPK, Pakistan · 2020–2024 · CGPA 3.56 / 4.00
